

智能产蛋计数监测系统 Intelligent Egg Production Counting & Monitoring System

重新定义蛋鸡管理 | Redefining Layer Management

精准到"笼"的智慧之眼 Smart Eyes Precise to the 'Cage'

本系统专为笼养蛋鸡舍设计，安装于自动化蛋带之上。通过全链路数据捕获，实现从全舍总量到每列、每层，乃至精准识别各笼组产蛋量的数字化管理，助您快速锁定高低产鸡群，优化决策。

Designed for automated egg belts in caged layer houses, this system provides comprehensive data capture from total farm production down to individual cage groups, helping you identify high/low producers and optimize decisions.

全域覆盖
Global Coverage

精准到笼
Precise to Cage

多维穿透
Multi-Dimensions

简易安装
Easy Installation

实时统计全舍产量，让您拥有宏观视角，把控整体生产动态。

Real-time statistics of total house production, providing a macro perspective to control overall production dynamics.

核心突破！精准识别各笼组产蛋分布，快速锁定“高产优等生”与“低产待补位”

Core breakthrough! Accurately identify the egg production distribution of each cage group, quickly locking in "high-yield elites" and "low-yield underperformers."

自动拆解每列、每层产蛋数据，性能差异一目了然，告别模糊概数。

Automatically break down production data for each row and tier. Performance differences are clear at a glance—no more vague estimates.

专为自动化蛋带设计，结构紧凑，安装便捷，适配多种现有笼养设备。

Specially designed for automated egg belts with a compact structure for quick installation, compatible with various existing cage equipment.

数据驱动决策，精细成就高产
Data-driven decision-making for higher yields.
